

Adaptive Methods

ADAPTIVE METHODS

Founded in 1972, Adaptive Methods (formerly known as Advanced Hydro-Acoustics Research, Inc (AHA)) is a privately owned small business headquartered in Centreville, Virginia (Zone 2), who, in partnership with the federal government, addresses critical U.S. Navy Anti-Submarine Warfare (ASW) needs. The company combines systems engineering, software development, testing and evaluation, and installation to develop innovative sonar software systems solutions that fulfill and enhance the Navy's ASW mission capabilities. Adaptive Methods is a leader in real-time ASW system prototyping and maintains a proud tradition of performing cutting edge research and implementing unique, inventive solutions for ASW problems in the areas of sonar/acoustics beamforming, signal processing, modeling and simulation, and tactical decision aid development.
