

Applied Physical Sciences Corp (APS)

Applied Physical Sciences Corp. (APS) was established in 2002 to provide specialized high-end research and engineering services to the US Navy and others at competitive costs. These services emphasize technology development and application in the physical science disciplines of acoustics, structural mechanics, hydrodynamics, and sonar. APS also provides research and development activities, engineering analyses, and test planning and conduct. Our staff has supported a number of high visibility projects at the Office of Naval Research (ONR), the Naval Sea Systems Command (NAVSEA), the Naval Surface Warfare Center (NSWCCD), and several private companies. APS' staff is comprised of individuals who have significant research and development experience acquired throughout their careers.
