

Eagle Systems

Eagle Systems is an independently-owned business specializing in engineering, technical, logistics, and administrative support of airborne and surface weapon systems for the DoD and in particular for the U.S. Navy. The corporation is headquartered in California, MD and operates field offices in Lakehurst, NJ and Virginia Beach, VA. Since 1980, the company has amassed an extraordinary performance record in providing services in support of U.S. Navy programs. Eagle Systems' many customers include NAVAIR, NAWCADLKE, NAWCADPAX, NRL, and COMOPTEVFOR. For these organizations, they support a broad spectrum of tasks in the areas of systems acquisition, test and evaluation, integrated logistics support, in-service engineering support and laboratory operations and maintenance. To do so, they currently hold a diverse business base of 37 engineering and technical contracts and subcontracts, yielding average annual revenue of \$23.3 million. Eagle Systems employs over 270 technical professionals, of which 80 percent have military and/or government service backgrounds and more than 20 years of experience. This multi-disciplined cadre of experts is comprised of degreed and technically trained personnel having established credibility in supporting programs with a need for personnel who understand the U.S. Navy operational and maintenance environment.
