

NTI Corporation

NTI has been supporting Naval Surface Warfare Center, Carderock Division (NSWCCD) departments since 1988. Our efforts were/are primarily in support of the NSWCCD product areas of ship and ship systems. Company projects involve significant interaction with NAVSEA and other activities. The major emphasis is on submarine, surface ship and advanced naval vehicle acoustic and non-acoustic signatures, which involves multi-disciplinary scientific, engineering and technical support efforts. The work we perform includes ship design RDT&E, acquisition and operational system support.
